LED LiteDimmer

LED LiteDimmer

PRODUCT NAME

LED LiteDimmer Single, 1.4 Handheld, 8-16VDC, 8a Max.

TYPE# (SKU)

LD-1.4-8A-LE

FEATURES

LiteDimmer is a flicker-free LED dimmer capable of dimming LiteRibbon in quantities up to 8 amps. It has very smooth action and outstanding range. Created by the engineering team here at LiteGear, LiteDimmer is designed to adjust the output of our LED LiteRibbon without camera-flicker whether using sync-sound, ramping, or high speed film. It is even steady when using the RED camera with its "rolling" shutter. The unit uses a method of control we call "Dynamic PWM", meaning even at low levels, LiteDimmer compensates and ensures problem-free, silent operation. Also, compatible with Rosco's Litepad™.

Flicker Free operation with Dynamic PWM

Smooth 0 -100% range

"Short" circuit output protection

SPECIFICATIONS

SIZE: 53mm (2") wide x 43mm (1.7") tall x 108mm (4.25") long

INPUT: 12V DC (8-16v)

RATING: 8.0A Max , 7A Continuous, LED Loads only

WATTS: 96 Watts Max

WEIGHT: 90g (3oz)

OUTPUT- PWM > 19KHZ - 32KHZ
