

LED LITESTIX PRO

Fully-Assembled Aluminum Housing with VHO Pro LED LiteRibbon™.

LiteStix Pro are factory-assembled using “Half Round” aluminum profiles with a frosted poly lens. They include the all-new VHO Pro LiteRibbon™ in Tungsten (3200K), Daylite (6000K), or Hybrid (3200K ~ 6000K). They are completely wired and available in 15cm (6”), 30cm (12”), 60cm (24”), and 90cm (36”) lengths. Made of extruded aluminum with a frosted poly lens, LiteStix formalize the installation of LiteRibbon™ by protecting the LEDs from environmental elements as well as by obscuring the visibility of the individual emitters. The end result is a beautiful finished light fixture. Production designers and art directors will love the look while the set lighting department will enjoy their choice of LiteRibbon™ and the controls to power it.

Variations

- LiteStix Pro, Tungsten White (3200K), 15cm (6”) length
- LiteStix Pro, Tungsten White (3200K), 30cm (12”) length
- LiteStix Pro, Tungsten White (3200K), 60cm (24”) length
