

Introducing

VHO Pro LED LITERIBBON

Full-Spectrum, Flexible, and now completely Color-Correct.

The LED building blocks for your next great idea.

Flexible, cuttable, and adhesive-backed, LiteRibbon™ can be used nearly anywhere. Thin enough to be mounted to a mobile phone, small enough to be installed into an actor's helmet, or large enough to be spread out over a 4' x 4' panel, LiteRibbon™ is only limited by your imagination.

Genuine VHO Pro LED LiteRibbon™ is available in 24 variations.

- TWO densities: Hard 120 and Soft 60.
- FOUR widths: one, two, three, and six rows wide.
- THREE colors of white: Tungsten, Daylite, and tunable Hybrid.

It is the only color-correct, color-balanced LED ribbon available.

Other similar products claim "high-CRI" or "no green" but pale in comparison to VHO Pro's full-spectrum color rendering and LED consistency.

Choose ready-to-shoot kits, semi-custom packages, or à la carte setups.

Complete LiteRibbon™ Kits

LiteRibbon™ Kits include everything you need to start using LED LiteRibbon™ in Tungsten, Daylite, and Hybrid white colors. Choose from 30 different kits like our "Basic" and "Simple" entry-level kits, or choose one of our Pro "Reality," "Commercial," or "Feature" kits. There is even a Pro "Car" kit that includes nearly 17 sections of LiteRibbon™. Kits include VHO Pro LiteRibbon™, Chroma LiteRibbon™, LiteStix Pro units, and the all-inclusive LitePower Packs that include power supplies, dimmers, cables, adapters, and battery adapters.
